PROFILE

Nurse turned software developer from England. Since completing my Children's Nursing Degree, I have worked in a variety of roles. In 2021 I decided to pursue a career change and enrolled on a self-paced software development course. Now I am looking for my first role as a front-end developer, to build on the skills and knowledge that I have gained.

EXPERIENCE

Trainee Software Developer, _nology

Oct 2021 — Sep 2022

Completed a software development bootcamp course alongside my nursing day job. Learning full-stack web development skills with emphasis on front-end languages. Implementing industry methodologies and frameworks in my work. Projects built throughout this course that showcase my development can be seen on my GitHub & Portfolio.

Key Topics:

- Command line navigation.
- Building and designing responsive user interfaces using HTML, CSS, SCSS, BEM & Bootstrap.
- Extensive experience in JavaScript, using both OOP and functional programming. Projects included creating games, a calculator and a morse code translator.
- React, used React Hooks and interacted with APIs to build a directory web app, allowing users to filter and search through data.
- Implemented unit testing on projects using Jest, Enzyme and React Testing Library. Used test driven development in projects.
- Collaborating with other developers using GitHub.
- Using Node.js to build an API.

Immunisation Nurse, COVID-19 vaccination service

Brighton

Oct 2021 — Aug 2022

Delivering vaccinations at mass vaccination sites, mobile vaccination units and patients' homes. As the clinical lead I was in charge of leading a team of both clinical and non-clinical staff during vaccination sessions, training new staff and ensuring everyone was working safely and effectively.
